

Random Numbers for Kinetics Experiment Series Z

Generated on January 6, 2002

The following is a list of random numbers to use in picking places on the grid. Select them in order down the list. Do not select them randomly as that can result in a bias towards numbers at the centre of the table. As an example, if the random number was 91 then we pick grid coordinate (x,y) equal to (9,1).

Try Number	Random Number	Run Number	Remaining A or B
